

# PARADOXCAT

## Senior Android Software Developer (w/m/d) - Munich

Paradox Cat GmbH is a specialist software development partner in the area of real-time graphics. As a partner and supplier of various premium automotive manufacturers, we support graphical interface development for high-end in car cluster instruments and infotainment systems. In addition to this, PARADOXCAT GmbH has increasingly participated in Proof of Concept projects and feasibility studies in the Human Machine Interaction (HMI) spectrum. Here, we focus on the implementation of new emerging technologies and their usability and implementation in the car of the future.

### **You will:**

- Develop next-generation user interfaces to enthuse your customers
- use Android Studio, git and Gradle with ease, confidence, and assurance
- gain inspiration from working with designers and UX experts to strive for perfect usability
- tackle technical challenges of all kinds as part of a Scrum team to achieve best possible sprint results

### **You have:**

- a degree in computer science, a comparable qualification, or equivalent experience
- at least five years' experience developing with Android/Kotlin(/Java)
- worked with or have a strong motivation to work with Android MVVM Design Pattern, Coroutines, Dagger, RxJava, Jetpack Navigation etc.
- experience with automated testing (Robolectric, Espresso), Gradle and Git
- extensive knowledge of at least one other programming language (C++, C, C#, Python or JavaScript)
- experience working on agile projects
- an excellent standard of written and spoken English

### **Nice to have:**

- good knowledge of written and spoken German
- a Scrum Master certification
- a Scrum Product Owner certification
- some experience with AOSP and Gerrit
- familiarity with Docker, Vagrant, Hudson/Jenkins, or TeamCity/Codecraft

### **We offer:**

- Independent, self-managed working with responsibility as part of a small team of top developers
- Exciting, long-term projects in the HMI environment with plenty of opportunity for you to drive your own personal and professional development
- A training budget for external courses at your disposal
- Professionally managed projects with a good work-life balance
- Visa/relocation support
- 30 days of annual leave
- Job Bike/Job Ticket
- Flexible working time model, Home Office
- Team Events

- 
- Hackathons
  - Free coffee and drinks at the office
